

## STUDENT REPORT

#### **DETAILS**

Name:

S ASIF HUSSAIN

## **EXPERIMENT**

Title 300

ENCODE THE NUMBER

### Description

You work in the message encoding department of a national security agency. Every message that is sent from or received in your office is encoded. You have an integer N, and each digit of N is squared and the squares are concatenated together to encode the original number. Your task is to find and return an integer value representing the encoded value of the number.

input1: An integer value N representing the number to be encoded.

#### Output:

Return an integer value representing the encoded value of the number.
